

P007- Denison Mines fonds

1956-1991

9.77 m. of textual records, ca 25 videotapes, and other types of documents

Administrative History: Denison Mines Limited operated in Elliot Lake, Ontario from 1957 to March 1992. In April 1954, Stephen B. Roman purchased approximately 3,300 acres from North Denison Mines. In that same year, the company was reorganized and renamed Consolidated Denison Mines Limited. After their merger in 1960 with Can-Met Explorations, the company was renamed Denison Mines Limited. In 1961, the company entered the oil and gas industry in Canada, United States, Greece and Spain. In 1974, after amalgating with Stanrock Uranium Mines, Denison Mines Limited acquired Stanrock's property and assets. In 1980, the company purchased uranium properties from Noranda Australia Limited, that were outside of Canada .

The uranium produced by Denison Mines sites in Elliot Lake, provided fuel that was an important part of the electricity for Japan, Spain and also for Ontario, the nuclear plants were important clients.

Although the Denison Mines sites in Elliot Lake closed in 1992, the company remained active there until 1997 in cleaning up the sites.

Scope and Content: The Denison Mines fonds consists of correspondence, union-management agreements, contracts, maintenance files, security files, health and safety files, accounting and shipping files, personnel records housing plans and development files. It also contains, maps and engineering diagrams, photographs and the complete series of Denison Mines publication "*Nucleus*".

Although not all level of operations are documented and despite that there are gaps for different years, the records of this fonds inform us on the Denison Mines administrative and business activities. Files on shipping of extracted minerals are included in the fonds. Their role in the development of the City of Elliot Lake, as well as the closing of the mine site in Elliot Lake and its implication for the city, are documented .

Note: Custodial history: Some of the records were kept at the office in Elliot Lake but most of them were in a closed mine site building.

: Immediate source of acquisition: The fonds was donated in 1995.

: Finding aid: [a list is available](#).
