

**P132- Sudbury Planning Board/Junction Creek fonds
1964**

0,4 cm of textual records, 10 maps

Administrative History: Even though the administrative structure of the City has evolved since 1964, the Planning Board's role may have widened but the essence of their mandate remains.

The role of the Planning Service Division is "To ensure that the City of Greater Sudbury is planned and developed in a manner which expresses the goals of its residents as defined in its official and corporate strategic plans by employing good planning and development principles necessary for an enjoyable and beautiful community in which to live, work, play and shop. To foster community development at community, neighbourhood and individual project levels."

The Planning Committee's mandate is "to hear matters and make decisions regarding issues dealing with the disposition of surplus municipal lands, street name approvals, street name changes - building renumbering, road and lane closures, disposition or opening of footpaths, matters involving heritage designations, land use issues including land acquisitions and expropriations, and except where otherwise provided either in this by-law (*Rules of Procedure By-Law 2002-202*) or the *Municipal Act*, all hearings which are subject to or governed by the provisions of the *Statutory Powers Procedures Act*, including business and taxicab licensing matters".
